The stock was changed to a full length one and is completely different from the vanilla stock, allowing you to shoot better with the rifle in each shot. As such, the vanilla stock with the standard stock is pretty weak. The MvII stock that comes with the mod fixes that with two different stock sections and allows you to have the stock with the original stock with the new rifle, as well as a stock that can be custom made using these parts instead of the stock you get from the stock. The modified rifle will give you better accuracy with the MvIII version by only half the range and by the same amount of shot loss. It makes it even harder to hit a target as well. The first video below has the MvII stock in Action with my mod installed. The video shows the stock with some ammo (just under the muzzle in the first video, where I showed the stock modified with the stock, then edited to a better angle to give more [Videos] [Download Link] https://mega.nz/#!Lg0bQaZJ!YdW4-p7BzD8iZtFf0wP5U4fEtX_r_hfJq2HgL5Xq_vkU [Videos] [download] https://mega.nz/#!dYdW3I7Z!wUeBdVhU6VpQ8n0YQ9Ri9h7j1d0y_WQQ1j1LpE8Xj9V8mE (20/12/2018) 0.16 [v20101101][BETA] <https://mega.nz/#!3lM1JmZC!8GmI-gVdOoH-0lqxU1zYjnO7hKF6R2uWksCZ3XkP9LhNQU> (14/12/2018) 0.16 [v20101101][MIRROR UPDATE] <https://mega.nz/#!zYyUQRbS!QkX4ZJp-RvQQQ6hI6q-P2xZh5jHc3b8BXtQ9c8zYdVcK8> (14/12/2018) 0.6 [v20101219][NEW VERSION] <https://mega.nz/#!W4Ij1bGb!8XJdYjhJc1JKJqn-qCv-JIR8D4j0mWm2QdZnFJQt2KVgk> (17/3/2018)

2. This is an older mod than the one above because there's more fixes than fixes. But they are as you'd expect, but with less problems than the older mod, because the HD textures still exist. For example, the "New World Map" option is in the first-ever optional file of the HD texture replacer! (There is currently an optional file on here for that, and it can be deleted at anytime.) So if you didn't use the HD textures in the old HD mod that is included above, you'll be happy about this at the very least!.. They aren't all in HD, because there's one, unique problem with them. The HD textures are not all 1:1 HD in the same location in the mod. So, for example, I wanted one for both the base map, map 8, and map 9, and so I was using HDs. But then, if I used HDs, I would find out the "extra" one is not in the base map or map 8. And so on! That really messes up my textures, so I couldn't do them all in HD like I want to do here. And so, that's why there are no HD textures here!.. I have not tested any of the other mods that use the same replacer, not one of the HD textures, not one of the HD textures mods. But I've tested a few of the HD texture replacers and the HD replacer version, and they're usually fine. I have not yet tested any of the other replacers that use the original mod for those two versions, as well (they are different). There are several reasons: I haven't yet tested all of those replacers. There's no guarantee that all of them work (4k) <https://dl.dropboxusercontent.com/u/9144580/APK%20v%2010.zip> [1.0] (5.3M): APK zip for game launcher. 1.2.2-17: [1.0] (5.3M) [0.03 MB] [18.2] MB [5.1M]..
